SKILLS

TECHNICAL SKILLS

- **Programming:** Python, SQL, C/C++, C#.
- **Data Engineering:** Data Cleaning & Processing, ETL Pipeline (Basic), Data Modeling.
- **Database:** SQL Server, MySQL.
- **Tools & Methodologies:** Apache Spark, Git, BI, Databricks, JIRA, Agile/Scrum.

SOFT SKILLS

- Effective communication & teamwork.
- Problem-solving & analytical thinking.
- Self-learning & adaptability.

INTERESTS

- Programming & exploring new technologies.
- Reading technical books & self-development materials.

PROFESSIONAL SUMMARY

Data Engineer with a software engineering background and hands-on experience through personal projects. Skilled in building data warehouses, Spark-based pipelines, and analytics solutions using Python and SQL. Seeking to grow as a data engineer and contribute to data platform development.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER — **05/2019 - 04/2025**

Renesas Design Vietnam

- Developed and maintained **MCAL Autosar modules** for **multiple chipsets**

EDUCATION

COMPUTER ENGINEERING — **2015 - 2019**

University of Technology and Education Ho Chi Minh City

Graduated with Distinction | Link

PROJECTS

Independent Project — **2025 - 2025**

Anomaly Detection for Fraud Risk in Banking Data | Link

- Analyzed large-scale banking transaction data (50,000+ records) using Python and Power BI.
- Performed EDA, feature engineering, and customer segmentation.
- Built unsupervised anomaly detection models using **Isolation Forest, Local Outlier Factor, Kmean** and developed interactive dashboards to monitor.

Independent Project — **2025 - 2026**

End-to-End Sales Data Warehouse Project (SQL-based) | Link

- Built a SQL-based data warehouse using Medallion Architecture (Bronze, Silver, Gold layers).
- Developed stored procedures for ETL and data transformation
- Integrated multi-source sales data into star schema models.
- Implemented data quality checks and validation scripts.

Independent Project — **2026 - 2026**

Mobility Analytics Lakehouse Platform | Link

- Built a Spark-based Lakehouse platform using Medallion Architecture.
- Developed PySpark pipelines for data ingestion and transformation.
- Designed star schema models for BI and analytics.
- Implemented logging and quality checks.

CERTIFICATIONS

2025-2026

- Microsoft SQL Server Professonal Certificate - Coursera
- **Kaggle NoteBook Expert** | Đào Minh Thuấn
