SKILLS

TECHNICAL SKILLS

- **Programming:** Python, SQL, C/C++, C#.
- **Data Engineering:** Data Cleaning & Processing, ETL Pipeline (Basic), Data Modeling.
- **Database:** SQL Server, MySQL.
- **Tools & Methodologies:** Apache Spark, Git, BI, Databricks, JIRA, Agile/Scrum.

SOFT SKILLS

- Effective communication & teamwork.
- Problem-solving & analytical thinking.
- Self-learning & adaptability.

INTERESTS

- Programming & exploring new technologies.
- Reading technical books & self-development materials.

PROFESSIONAL SUMMARY

Data Analyst with a software engineering background, skilled in SQL, Python, and Power BI. Focused on data analysis, dashboarding, and delivering actionable insights to support business decisions.

EDUCATION

COMPUTER ENGINEERING **2015 - 2019**

University of Technology and Education Ho Chi Minh City

Graduated with Distinction

WORK

SENIOR SOFTWARE ENGINEER **05/2019 - 04/2025**

Renesas Design Vietnam

- Developed MCAL modules for multiple automotive chipsets and collaborated with cross-functional teams to ensure requirement alignment.
- Performed software testing, debugging, and code optimization to improve system stability and reduce defects.
- Maintained and enhanced Python-based automation scripts for UT, IT, and coding rule compliance, improving testing efficiency.
- Tracked and reported task progress, issues, and test results to support project monitoring and stakeholder communication.

PROJECTS

Independent Project **2025 - 2026**

Anomaly Detection for Fraud Risk in Banking Data | Link

- Analyzed 50K+ banking transactions to identify anomalous behavior and potential fraud risks.
- Applied EDA, feature engineering, customer segmentation (RFM, CLV) and cohort to understand customer patterns.
- Built and evaluated unsupervised models Isolation Forest, LOF, K-Means for anomaly detection.
- Developed Power BI dashboards to monitor anomalies and support data-driven decision-making.

Independent Project **2025 - 2026**

Superstore Sales Analytics | Link

- Analyzed ~100K retail transactions to evaluate sales performance, profitability, and customer behavior.
- Performed EDA, data quality assessment, and customer segmentation (RFM, K-Means).
- Conducted cohort analysis, QoQ growth analysis, and Pareto analysis to identify retention patterns and key revenue drivers.
- Delivered actionable insights on high-value customers, discount impact, and regional performance to support business decisions.

CERTIFICATIONS

2025-2026 • Microsoft SQL Server Professonal Certificate
